- Click the wand handle into the top of the appliance. Press the red button on the rear of the wand handle and slide the tube down. Close the wand cap.
- Attach the tools to the appliance and wind the cable anti-clockwise around cable hooks and secure with clip.

USING YOUR DYSON APPLIANCE

Unwind the cable and insert the plug into a suitable socket. Hold the cleaner head down with your foot and pull the handle downwards. To switch ‘ON’ or ‘OFF’ press the red power button in front of the handle.

CAUTION:

- Do not allow the appliance to be used by anyone who may not be able to operate it safely.
- The use of an extension cable is not recommended.
- Always switch ‘OFF’ and unplug before performing maintenance on your appliance.
- Ensure the cyclone is secured to the appliance. Do not press the cyclone release button or shake the appliance while carrying or it could fall and cause injury.
- Store the appliance indoors. Put the appliance away after use with the cable coiled safely, to prevent tripping hazards.
- Do not use outdoors or on wet surfaces or to vacuum water or other liquids – electric shock could occur.
- Do not lubricate any parts, or carry out any maintenance or repair work other than that shown in this Dyson Operating Manual, or advised by the Dyson Customer Care Helpline.

PLEASE NOTE:

- This appliance is intended for domestic use only. Fine dust such as plaster dust or flour should only be vacuumed in very small amounts.
- Do not use the appliance to pick up sharp hard objects, small toys, pins, paper clips, etc. They may damage the appliance.
- If used in a garage, care should be taken to wipe the soleplate and wheels with a dry cloth after vacuuming to clean off any sand, dirt, or pebbles that could damage delicate floors.
- Consult your flooring manufacturer’s recommended instructions before vacuuming and caring for your flooring, rugs, and carpet. Some carpets will fuzz if a rotating brush bar is used when vacuuming. If this happens, we recommend vacuuming in hard floors mode and consulting with your flooring manufacturer.
- When vacuuming, certain carpets may generate small static charges in the clear bin. These are entirely harmless and are not associated with the mains supply. To minimise any effect from this, do not put your hand or insert any object into the clear bin unless you have first emptied it and rinsed it out with cold water. (See ‘Cleaning the clear bin’ section on page 8).
- Do not use or store this appliance below 0°C. Ensure that the appliance is at room temperature before operating.

HARD FLOORS/CARPETS

Ensure the appliance is in an upright position before adjusting the setting. The brush bar will automatically stop if it becomes obstructed. If the brush bar stops during use, please refer to the ‘Clearing brush bar obstructions’ section (see pages 4 and 8).

HIGH-REACH CLEANING

- Switch ‘OFF’ the appliance before changing tools.
- Powerful suction can cause the hose to ‘pull back’ - please take care.
- Take extra care when vacuuming on stairs. Do not work with the appliance above you on the stairs. Do not put the appliance on chairs, tables etc.
- Ensure the appliance is in the upright position before using tools.

PLEASE NOTE:

- To release the wand, open the wand cap and pull the red tube from inside the handle until it clicks. Press the grey button at the front of the carry handle to release the wand and hose from the appliance. Tools can be attached to either the hose or the wand.
- The brush bar will not rotate when the appliance is in an upright position.
- Ensure wand cap is closed when not in use.

- Switch ‘OFF’ the appliance and unplug before emptying the clear bin.
- Empty as soon as the dirt reaches the level of the MAX mark – do not overfill.
- To remove the clear bin from the appliance, press the red button at the rear of cyclone carrying handle. To release the dirt, press the red bin release button.
